Программное обеспечение Movicon RT11 SCADA PIXSYS. Техническое описание

Movicon™ 11 is the secure and reliable solution to develop and maintain supervisory, control and data acquisition software applications with operator interface where data can be accessed remotely or from mobile systems. Movicon™ 11 offers a comprehensive development environment for managing HMI, SCADA, Logic and statistical production data analysis applications enabling design engineers to minimize development time and provide users with powerful, open, flexible and easy to maintain solutions.

Movicon™ 11 is one of a kind, completely based on XML standards and well established technologies such as Web Services, SVG graphics, OPC, SQL, ODBC, .Net as well as Java technology and APPs for Web Client solutions. A standard software for industrial automation, remote control, utilities and building automation. A truly universal Scada/HMI platform, independent from hardware, adaptable and deployable absolutely anywhere. Movicon™ offers an all-in-one platform that can be used at any level whether HMI operator panels and/or mobile devices based on WinCE, or personal computers in large industrial plant systems with client/server redundancy architecture and connectivity to any PLC, network and industrial or civil fieldbus.
